

Name _____

Period: _____

Relative Dating

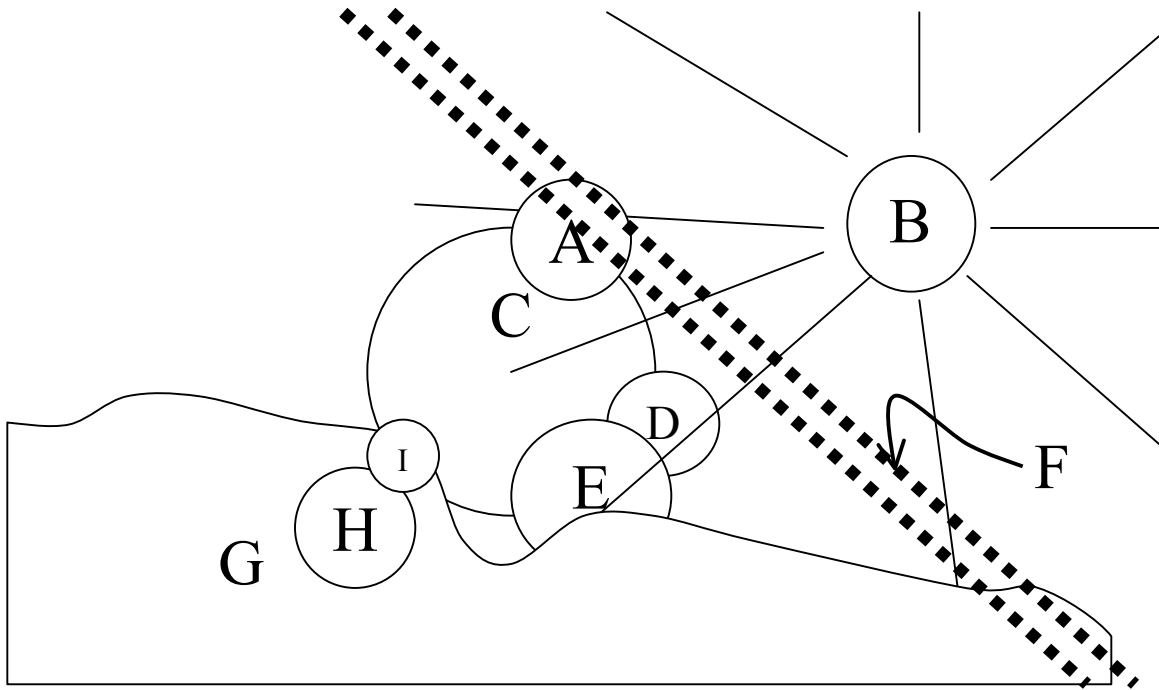

The diagram below is a picture of the lunar surface. The circles are craters.

The lines coming from "B" are rays of dust from the meteor impact that formed "B".

They form at the same time as crater "B".

F points to tire tracks from ancient aliens that drove on the moon's surface (for real!).

G is a lava flow from a lunar volcanic eruption.

Place each event in order of occurrence.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
